DETAILED ACTION

1. Claims 1-7, 9-11, 13, 21, 25 and 26 are now pending in the instant Application.

Response to Amendment

2. Applicant's Amendment and Response, submitted June 3, 2009, has been reviewed by the Examiner and entered of record in the file. Accordingly, claims 22-24 and 27 are cancelled, and claims 1, 2 and 25 have been amended.

Previous Claim Rejections –

35 USC § 112

3. Claims 22-25 previously rejected under 35 U.S.C. 112, first paragraph, because the Specification does not reasonably provide enablement for using compounds of formula (I) for the treatments listed in these claims.
4. Claims 24 and 27 previously rejected under 35 U.S.C. 112, first paragraph, as not being fully enabled.
5. In view of Applicants' amendatory changes and cancellations, the enablement rejections have been overcome and are withdrawn.

Claim Objections

6. Claims 1 and 2 previously objected to for minor informalities, regarding the definition of "L." Applicants have amended the claims, therefore the objections are withdrawn.

REASONS FOR ALLOWANCE

7. In view of Applicant's amendatory changes and cancellations, claims 11-7, 9-11, 13, 21, 25 and 26 are allowable over the prior art, as newly renumbered claims 1-14. The following is an examiner's statement of reasons for allowance:

Art Unit: 1626

This invention relates to novel pyrrolidine derivatives, their pharmaceutical compositions, and their methods of use. The allowable compounds are limited to compounds according to formula (I) of claim 1, that modulate PPAR activity. Certain pyrrolidine compounds are known in the art as having pharmaceutical activity, however the aspect of preparing the instant claimed phenyl-carbonyl-pyrrolidine-2-carboxylic acid derivatives, is novel and unobvious. The instant compounds were tested for selective binding of PPARs (please refer to *in vitro* data, etc. found in pages 39-41 of the specification), which makes them useful for treating diseases such as type II diabetes and hyperlipidemia. After a thorough search, the closest of prior art, U.S. Pat. No. 5,045,540 to Hodges et al was found to teach similar imidazole derivatives. However the '540 patent fails to teach or render obvious the instant claimed compounds according to formula (I), and does not fairly suggest methods of using the instant claimed compounds.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
